

# Carbon Reduction Plan

Supplier name: **Site Surveying Services Ltd**

Publication date: 25.01.2026

## Company Introduction and Context

Site Surveying Services Ltd, based in Clitheroe, Lancashire, has been a cornerstone in the surveying industry since its establishment in 1997. Renowned for its precision and reliability, the company offers a comprehensive range of services including land surveying, hydrographic surveying, and architectural support.

With a dedicated team of professionals and a commitment to delivering accurate results, Site Surveying Services Ltd has built a strong reputation for excellence. Their strategic location at Unit 1 Shawbridge Sawmill, Taylor Street, Clitheroe, further enhances their ability to serve a diverse clientele, ensuring that each project is completed with the highest standards of quality and efficiency.

Site Surveying Services has 15 employees FTE. The building is constructed of stone with a slate roof, and the type and level of insulation is unknown., The building was previously used as a Sawmill dating back to the 19<sup>th</sup> Century. The building is leased on a rolling monthly basis.

The company's hours of operation are Monday to Friday 8am-5pm.

Site Surveying Services has engaged East Lancashire Chamber of Commerce Sustainability Team funded via the Chamber Low Carbon Programme to calculate the carbon footprint and develop a Carbon Reduction Plan on their behalf to cover its organisational and operational activities within the defined scope.

## Commitment to achieving Net Zero

Site Surveying Services Ltd is committed to achieving Net Zero emissions by 2050.

## Baseline Emissions Footprint

**Baseline Year: January 2025 to December 2025**

**Additional Details relating to the Baseline Emissions calculations:**

This Baseline Carbon Footprint has been calculated using the Green House Gas Corporate Standard 2015 and utilised HM Government's Greenhouse Gas Conversion Factors for Company Reporting 2023. The Carbon Reduction Plan was developed by the East Lancashire Chamber of Commerce, Chamber Low Carbon based on the data presented by Site Surveying Services Ltd.

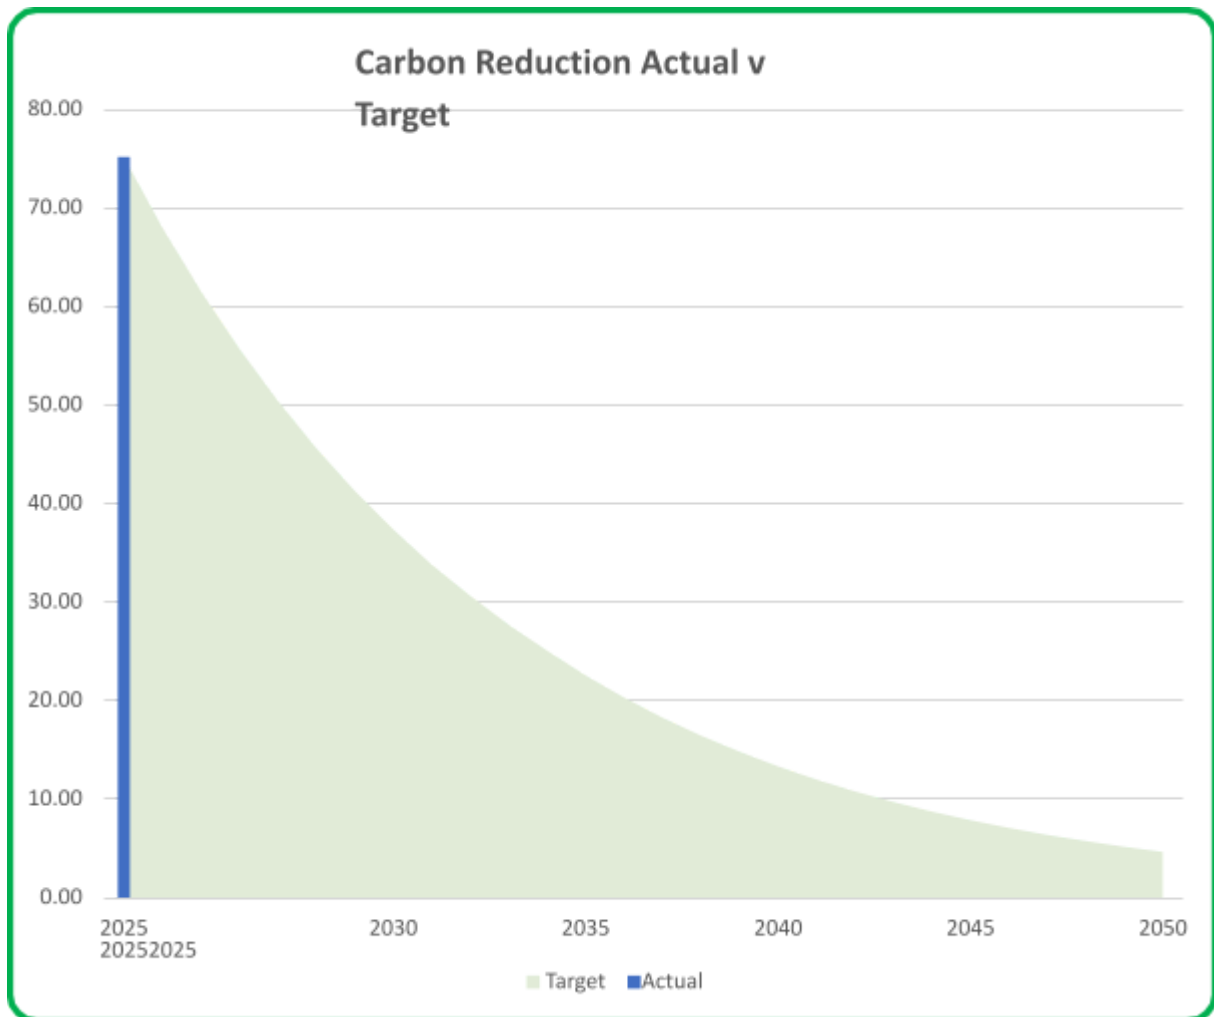

<b>Baseline year emissions: 2025</b>	
<b>EMISSIONS</b>	<b>TOTAL (tCO<sub>2e</sub>)</b>
<b>Scope 1</b>	44.44 Direct GHG Emissions <ul style="list-style-type: none"> <li>• Gas Usage</li> <li>• Company vehicles—Fuel consumption of company fleet.</li> </ul>
<b>Scope 2</b>	1.48 Electricity Indirect GHG Emissions <ul style="list-style-type: none"> <li>• Power and lighting, electricity consumption</li> </ul>
<b>Scope 3 (Included Sources)</b>	29.24 Other Indirect GHG Emissions <ul style="list-style-type: none"> <li>• Fuel and Energy-Related Activities Not Included in Scope 1 or Scope 2</li> <li>• Business Travel</li> <li>• Water Supply and Treatment</li> <li>• Staff Commute</li> </ul>
<b>Total Emissions</b>	75.15

## **Emissions reduction targets**

To continue our progress to achieving Net Zero, we have adopted the following carbon reduction targets.

We project that carbon emissions will decrease over the next six years to 37.37 tCO<sub>2e</sub> by 2030. This is a reduction of a about 50%.

Progress against these targets can be seen in the graph below:

## Carbon Reduction Projects

The 2025 data forms the baseline for the Carbon Reduction plans for Site Surveying Services Ltd.

The following environmental management measures and projects would be considered as part of the steps to achieve our carbon reduction goals 2025 baseline.

In the future we hope to implement further measures such as:

- Establish a “Green Team” across the business – with a view to suggesting ideas and implementing the carbon reduction plan
- Ensure that all carbon emission sources have been identified.
- Review the current thermostat settings and look to turn them down at least one degree Celsius and educate staff.
- Set the boiler on a timer to ensure it is never left running when not required.
- Replace standard radiator valves with TRVs.

- Consider the feasibility of increasing insulation throughout the building to prevent thermal losses in the winter and thermal gains in the summer.
- Explore the opportunity for diesel substitution with HVO (Hydrogenated Vegetable Oil).
- Consider replacing diesel vans with electric or hybrid vans.
- Install an EV charger on site.
- Explore installation of passive infrared sensors connected to lighting systems to ensure that they are on only when needed.
- Introduce a formal company-wide “switch off” campaign.
- Introduce Energy Efficiency and Carbon Management to staff inductions and re-fresher toolbox talks for existing members of staff.
- Commit to a carbon management policy and communicate to staff the aims and ambition of the policy and the role that they can play.
- Look at the option of switching to a green tariff when electricity contract is due for renewal.
- Replace remaining non-led lighting with LEDs.
- Consider sensor taps or push taps and dual flush systems when upgrading the toilet facilities.
- Fix all leaking pipes, toilet system and taps.
- Only use the dishwasher when full and where possible, set on an eco-programme.
- Conduct a waste and resources review. Where is the waste being generated? Can procurement help in the reduction of waste materials coming into the business?
- Review or develop a company business travel policy.
- Consider developing a companywide Travel Policy
- Consider introducing a carpooling scheme.
- Introduce a bike to work scheme.
- Consider installing shower and cycle storage facilities.
- Consider developing a companywide Sustainable Procurement Policy.
- Consider developing a companywide Sustainable Procurement Policy taking source location and transportation routes into account.
- Repeat the carbon footprint once all GHG emission points have been identified.

## Declaration and Sign Off

This Carbon Reduction Plan has been completed in accordance with PPN 06/21 and associated guidance and reporting standard for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard and uses the appropriate Government emission conversion factors for greenhouse gas company reporting.

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements, and the required subset of Scope 3 emissions have been reported in accordance with the

published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard.

This Carbon Reduction Plan has been reviewed and signed off by the board of directors.

**Signed on behalf of Site Surveying Services Ltd:**
